

Project Inform's PrEP videos for various communities

Embedding videos within your website's HTML code is easy ...

Project Inform's 7 videos on PrEP are found on Vimeo at <https://vimeo.com/prepvideos/>. Simply insert the HTML code that you find below for each video into the HTML code for your website's page. You can scale the size of the video on your web page by proportionally adjusting the width and height in the code. Right now they're set at 333 pixels wide by 187 pixels high. (See this size at projectinform.org/prep.) Various sizes include: 250w by 140h (3/4 current size); 500w by 280h (1.5 times current size); and 666w by 374h (twice current size).
